Retest or Retire (Driver degeneration) 4 hours.

This course will focus on elderly drivers. The degeneration of the body as people age and how that can affect the ability to drive safely will be discussed. This course specifically breaks down the normal faculty's drivers need to operate a vehicle safely. Students will be introduced to many disorders, degenerative diseases, natural age progression issues, and an overview of common medications to listen for while conducting investigations. This course will also discuss how the degenerative diseases could affect the subject's performance during standardized field sobriety exercises.
